Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08/18/2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 5,6,8-16,19-21,28 and 29 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED OFFICE ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/18/2006 has been entered.

For the purpose of examination, the limitation recited in lines 2 and 3 of instant claim 21 of "a set of instructions for use in a computer system to help cause the computer system to derive fixed bond information" has been construed to read as an executable computer program.

Claim Rejections - 35 USC § 112, First Paragraph

The rejection of claims 5, 6, 8-16, and 19-21 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement is withdrawn in view of amendments made to the instant claims as well as arguments presented by applicants.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regards to a claimed invention that encompasses both an apparatus and the method steps, MPEP 2173.05(p) states:

“A single claim which claims both an apparatus and the method steps of using the apparatus is indefinite under 35 U.S.C. 112, second paragraph. In *Ex parte Lyell*, 17 USPQ2d 1548 (Bd. Pat. App. & Inter. 1990), a claim directed to an automatic transmission workstand and the method steps of using it was held to be ambiguous and properly rejected under 35 U.S.C. 112, second paragraph. Such claims should also be rejected under 35 U.S.C. 101 based on the theory that the claim is directed to neither a “process” nor a “machine,” but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. 101 which is drafted so as to set forth the statutory classes of invention in the alternative only. *Id.* at 1551.”

Claim 20 recites in the preamble “a computer-implemented system for use in deriving fixed bond information”. However, it is unclear from the recited term “system” if the claimed invention is drawn to a process, an apparatus, or overlaps both statutory categories. In addition, the instant claim recites the limitations of “an analyzer analyzing a delocalized structure” (see line 3), “an identifier identifying... a plurality of fixed bond representation candidates” (see lines 6 and 7), “an evaluator evaluating at least a subset of the fixed bond candidates” (see line 11), “a selector electing from among the plurality of the fixed bond candidates” (see line 12), and “a producer producing fixed bond information” (see line 13), wherein the above cited limitations are drawn to both

Art Unit: 1631

apparatus components as well as active process steps of using said apparatus component. Further, the instant claim recites the limitation "said produced fixed bond information being output by the system", which is drawn to a result of performing a process. Therefore, it is unclear what statutory category the instant claim is directed towards as the claimed "system" encompasses both statutory categories of an apparatus and a process.

For the purpose of continuing examination, claim 20 has been construed to be drawn to only a computer-implemented apparatus.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 20 is rejected under 35 U.S.C. 101 because the claimed invention is directed to neither a "process" nor a "machine," but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. § 101 for the reasons provided above.

Claim Rejections - 35 USC § 102(a)

The rejection of claims 5, 6, 8-16, and 19-21 under 35 U.S.C. 102(a) as being anticipated by Glendering et al. is withdrawn in view of amendments made to the instant claims.

Claim Rejections - 35 USC § 103

The rejection of claims 5, 11, 15, and 20 under 35 U.S.C. 103(a) as being unpatentable over Graovac et al. is withdrawn in view of amendments made to the instant claims.

Allowable Subject Matter

Claims 5, 6, 8-16, 19, 21, 28, and 29 are allowed.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric S. DeJong whose telephone number is (571) 272-6099. The examiner can normally be reached on 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on (571) 272-0811. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
